# FLEX 4.2

## A breakthrough in HTPC world: the best technology with top of the class audio performance

### ... starting from design ...

the compact chassis, as small as a DVD player - designed and manufactured in Italy by P.Guerra - is made of the finest materials, piano black aluminium for the top cover, smoke-gray crystal for the front panel. The four repositionable bearings and the volume control knob are machined from solid, massive aluminium rods. The thick crystal panels feature a stylish bi-colour serigraphy matched with a retro-tech "red LEDs" discreet indicators.

### without overlooking technology

As all our HTPCs, FLeX offers you the best technology available today. It uses a mobile Intel Core Duo CPU, giving top performance and whisper-quiet operation, multiple tuner options (analogue or Digital TV, Satellite, Cable), massive storage, high definition multi-channel audio. First in the world, FLeX 4.2 integrates a hi-end stereo audio amplifier giving you 400W RMS thanks to ICEpower technology by Bang & Olufsen ICEpower a/s. This exuberant power is tempered by a audiophile-grade audio attenuator and controlled by a sophisticated custom electronics. No buttons: just brush the front panel icons with a finger and you will turn FLeX on or off, mute audio, eject DVD or select a different audio source.

### or everyday use

All FLeX functions are controlled by a single infrared remote and, specially for Bang & Olufsen A/V systems owners, an optional - integrated - receiver allows you to control the FLeX by a Beo4 remote.

Our advanced design, lets you operate the audio amplifier without turning on the PC and use it with any audio source. Another unique and patented feature is the foldable chassis: no issue for your interior design. You may set up FLeX in a slim, wide, configuration and set it under you TV screen or fold it and fit it between two loudspeakers or on a bookshelf. No cable to reconnect, no parts to assemble: fold, reposition the bearings and you are done!

### or your current needs

If you currently don't need or already own a stereo or multi-channel audio amplifier, the FLeX 0 model is available. It features all characteristics and quality of FLeX 4.2 except for the audio amplifier. Its size is a mere 31 x 21.5 x 8 cm making it one of the smallest fully fledged HTPC on the market. And if you should need the audio amplifier in future, no fuss: FLeX 0 may be upgraded to FLeX 4.2 saving your present investment (factory return required).

## P.Guerra

Established in 1929 as electro-mechanical firm, for last 15 years P.Guerra joined its historical business with manufacturing and distribution of personal computers and its peripherals.

P.Guerra designs, manufactures and sells professional video editing workstations and offers training and consulting to professionals of this field.

The engineering division designs and develops - also for third parts - solutions and software or hardware for video acquisition and archival and for creation, distribution and fruition of multimedia contents.

During last four years P.Guerra patented and carried our several components for Home Entertainment that you may experience in the company Show Room or at selected Dealers.

P.Guerra is certified Adobe Partner, Matrox Golden Reseller, Avid Partner, Intel Product Integrator, Microsoft Windows Media Center partner and applies an ISO 9001:2000 quality control system to its manufacturing and designing activities.

## P.Guerra srl

Headquarter and Show Room Via Fiuggi, 38 - 20159 Milano - Italy  
Phone 02.683840 - 02.66807070 - Fax 02.683578  
Email: info@pguerra.it - Internet: www.pguerra.it

### COMMON FEATURES

- Piano black foldable, patented, chassis with smoke-gray crystal front panel and soft touch controls
- Repositionable dumping bearings
- Volume knob with audiophile grade motorized attenuator
- Power supply: 220V or 110V c.a.
- Hardware: Intel Core Duo CPU 2.0GHz or faster, ultra-quiet operation, 1024MB DDR2 RAM expandable to 2GB

### STORAGE

- Dual Layer & Dual Standard DVD writer
- Optional DVD-HD or Blue Ray reader/writer
- Hard disk: from 320GB to 750GB, Serial ATA-II

### TUNERS

Up to 3 tuners, including analogue TV, Digital Terrestrial TV, Digital Satellite TV or Cable Digital TV. Common Interface for scrambled broadcasts reception available.

### USER INTERFACE

- Infrared Remote, Windows Media Center / Windows Vista compliant.
- Soft touch front panel with red led indicators
- Optional Bang & Olufsen Beo4 remote control receiver
- Bluetooth Keyboard and Mouse

### INTERFACES

- Ps/2 Mouse and Keyboard
- USB2, FireWire
- Video outputs: PAL/NTSC Composite, S-Video and Component, VGA, DVI
- Audio outputs: up to 7.1 analogue channels (line level), S/PDIF / Toslink digital audio
- Audio inputs: RCA stereo audio input (FLeX 4.2 only)
- Gigabit Ethernet (10-100-1000Mb/s) LAN
- Optional Wireless Lan

### AUDIO AMPLIFIER (FLeX 4.2 only)

- 2 x 200W @ 4Ohm RMS or 2 x 100W @ 8Ohm RMS
- ICEPower technology by Bang&Olufsen ICEpower a/s
- Auto power-on / power-off for a minimum energy waste
- Short-circuit, overload, overheat protection

### SIZE AND WEIGHT (FLeX 4.2)

- Size (WxHxD): 43 x 8 x 35 cm wide, 21.5 x 16 x 35 cm folded
- Weight: 6kg, variable depending on configuration

### SIZE AND WEIGHT (FLeX 0)

- Size (WxHxD): 21.5 x 8 x 35 cm
- Weight: 3kg, variable depending on configuration

### SOFTWARE

- Microsoft Windows Media Center Edition, Microsoft Windows Vista, P.Guerra Media Companion, P.Guerra BeoController (optional), P.Guerra Janus

### WARRANTY

- 2 years on labour and parts

Subdued to availability. Upgraded version required, expected by Q1 2007. Specifications may change even without notification. Third parties registered trademarks belong to respective owners.
